PERSONAL STATEMENT

Computer Science undergraduate at Nile University with a growing specialization in UI/UX design and user-centered product development, currently advancing through the Google UX Design Professional Certificate (2 of 7 courses completed). Brings hands-on experience across a range of academic software projects — including a C++ university management system, a team-built process manager modeled on systemd/init.d, a database system for an ophthalmology department, and a data analysis project examining socio-economic drivers of U.S. real estate markets. Gained early industry exposure through a one-month internship at valU, a leading Egyptian fintech company, and currently serves as Vice Head of the Operations Committee for the Nile University Student Union, building experience in team leadership and cross-functional coordination.

EDUCATION

Bachelor of Science in Computer Science — Nile University *Expected Graduation: 2027*

- Relevant Coursework: Data Structures, Algorithms, Database Systems

Thanaweya Amma — Thebes International Schools2023

- Subjects: Science (A), Physics (A), English (A)

WORK EXPERIENCE

Intern — valU Egypt1 Month

- Completed a one-month internship at valU, a leading Egyptian fintech company that pioneered Buy-Now-Pay-Later (BNPL) solutions in the MENA region.

PROJECTS & EXPERIENCE

Minesweeper Game — 2023–2024

- Developed a full Minesweeper game in Python with procedural generation and core game logic.
- Built an event-driven user experience with live notifications and interactive feedback.

Inventory Management System — 2023–2024

- Built a C-based inventory system with full CRUD operations and binary file persistence.
- Implemented audit logs and an optimized command-line interface for usability and clarity.

University Management System — 2023–2024

- Created a C++ student management system using optimized data structures.
- Implemented enrollment and waitlist features with performance-focused design.

Simplified Init System (Process Manager) — Team Project

- Implemented a basic init system that starts and stops processes based on a configuration file, similar in concept to systemd/init.d.
- Collaborated with a team to design process lifecycle management, configuration parsing, and process control logic.

Ophthalmology Department Database System — Academic Project

- Designed and implemented a relational database system to manage core records and day-to-day operations for an ophthalmology department.

Urban Real Estate Market Analysis — Data Analysis Course ProjectDec 2025

- Analyzed 1,000 neighborhood-level data points across 10 major U.S. metropolitan areas to uncover socio-economic drivers of property value and growth.
- Applied correlation analysis to evaluate relationships between tech employment density, school quality, short-term rental activity, and property price trends.
- Synthesized findings into strategic, data-driven investment recommendations highlighting high-growth and best-value markets.

CERTIFICATIONS

Google UX Design Professional Certificate — CourseraIn Progress (2/7 Courses)

- Completed: Foundations of User Experience (UX) Design
- Completed: Start the UX Design Process: Empathize, Define, and Ideate

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Vice Head, Operations Committee — Student Union, Nile UniversityCurrent

- Support the coordination and execution of Student Union operations, events, and initiatives.

- Contribute to team leadership, planning, and cross-committee collaboration within the university community.

Usher & Rooms Organizer — IAMOT 2026 (International Association for Management of Technology)2026

- Contributed to the organization of IAMOT 2026 in Egypt, an international academic conference, by serving as an usher and rooms organizer.
- Communicated directly with international attendees in English, providing directions, session information, and on-site support throughout the event.
- Strengthened English communication and interpersonal skills while representing the event to a diverse, global audience.

SKILLS

Design & UI/UX

- User Research & Personas
- Wireframing & Prototyping
- Usability & Accessibility Principles
- Design Thinking
- UX Case Study Development

Programming & Technical

- C++, C, Python, Java, SQL
- Basic Front-End & Full-Stack Concepts
- Microsoft Office, Google Workspace

Soft Skills

- Teamwork & Collaboration, Problem-Solving, Communication, Leadership, Presentation Skills

LANGUAGES

- Arabic: Native
- English: Fluent

INTERESTS

- UI/UX Design & Product Thinking • Competitive Programming (Vjudge, Codeforces) • Tech Blogging • AI & Emerging Technologies • Travel
